Web Developer | Process Engineering Consultant

Full Stack Web Developer and Experienced Process Engineer interested in developing professional applications. Leveraging engineering background to provide additional expertise in developing the web based engineering and financial software.

TECHNICALS SKILLS AND TECHNOLOGIES APPLIED

HTML, CSS, JavaScript, jQuery, Node, API, Express, MYSQL, Handlebars, Bootstrap.

APPLICATIONS BUILT

Project-2

- Developed an art gallery website "Galleria" developing both front-end and backend of the project.
- Used Node, JavaScript, API routes, Express, Sequelize and MYSQL technologies to support the project.
- Contributed in developing the login and sign-up pages using handlebars in the team of five.

Project-1

- Developed "the Gooberville-Foods" website using two different food recipes' APIs.
- Used JavaScript, Fetch API, JSON and HTML to support the project in the group of five.
- Contributed in building the "Saved-Recipes" section of the project.

Password-Generator(PasswordGen)

- Used JavaScript, Bootstrap and CSS to develop basic password generator logic.

Quiz Code (Quiz)

- Developed a test quiz using JavaScript and Ajax tools.

Weather Forecast(Weather-API)

- Used weather API to develop a weather forecast web page.
-

EXPERIENCE

Process Engineer Advisor, worked with various local and international Companies:
(ORASCOM, CH2M HILL, KBR, SABIC and AMEC)

2007-20120

- Used process engineering software (HYSIS, ASPEN and PRO/II) to develop process models.
 - Developed process datasheets and drawings using engineering tools.
-

EDUCATION

Certificate, Full Stack Web Development _____ Rice University, Houston, Texas

Graduate Degree in Chemical Engineering _____ Calgary University, Alberta, Canada
